

Spreader calibrations - KUHN

Spreader settings for KAN and KAN Plus range can be found on the Bunn Fertiliser website www.bunnfertiliser.com.

The spreader settings below are for guidance only. The exact fertiliser rates and spreading patterns using these settings cannot be guaranteed as the application will be affected by the condition of the spreader itself and the environmental conditions at the time of application.

To ensure greater accuracy, the spreader should be recalibrated for application rate and spread pattern using a tray test. Up to date information can be found on the spreader manufacturers website.
